

DBMS Lab Assignment 02

Shashank Shekhar Asthana (B21CS093)

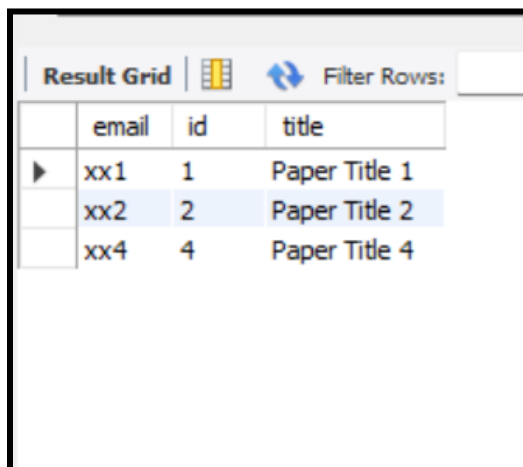

Displayed below are screenshots of all the queries that have been asked to retrieve data by creating different tables and relationships using the MySQL server .

Query 1:- Retrieve the distinct and complete names and emails of the authors who have submitted at least one paper for review.

	email	full_name
▶	xx1	John Doe
	xx2	Jane Smith
	xx3	Michael Johnson
	xx4	Emily Williams
	xx5	David Brown

Query 2:- Retrieve the email, id, title of the paper submitted by the author that has an average score of 7 or more on its review.

	email	id	title
▶	xx1	1	Paper Title 1
	xx2	2	Paper Title 2
	xx4	4	Paper Title 4

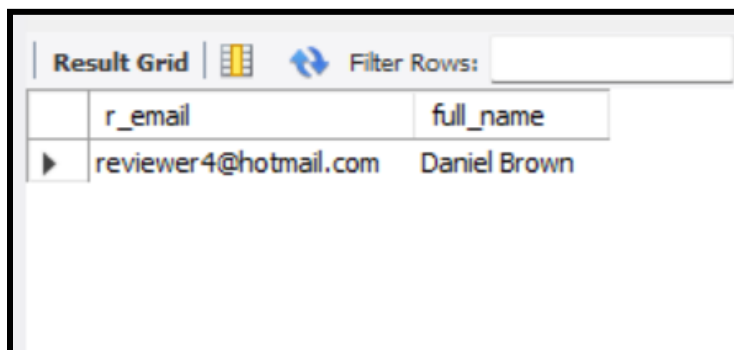

Query 3:- Retrieve the paper id, title, and score, which is the lowest in the review process received.

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with four columns: 'id', 'title', and 'lowest_score'. There are five rows of data, each representing a paper. The rows are: (1, 'Paper Title 1', 8), (2, 'Paper Title 2', 7), (3, 'Paper Title 3', 5), (4, 'Paper Title 4', 9), and (5, 'Paper Title 5', 6). The interface also includes a 'Filter Rows' button and a search input field.

	id	title	lowest_score
▶	1	Paper Title 1	8
	2	Paper Title 2	7
	3	Paper Title 3	5
	4	Paper Title 4	9
	5	Paper Title 5	6

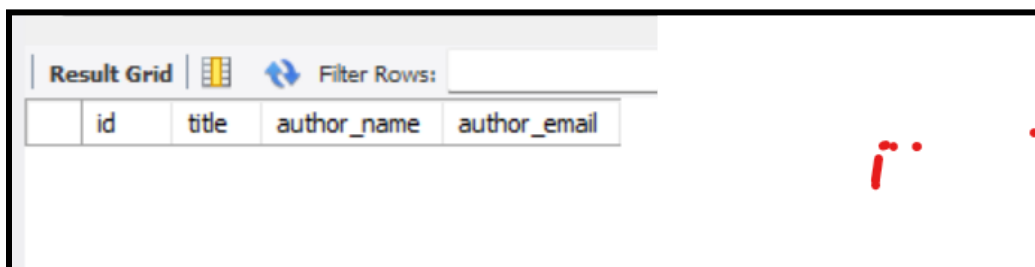

Query 4:- Retrieve distinct emails and names of reviewers who are interested, typically in the topic “security.”

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with two columns: 'r_email' and 'full_name'. There is one row of data: (reviewer4@hotmail.com, Daniel Brown). The interface also includes a 'Filter Rows' button and a search input field.

	r_email	full_name
▶	reviewer4@hotmail.com	Daniel Brown

Query 5:- Retrieve the paper id and title of papers along with the author's name and email such that the author is also a reviewer.

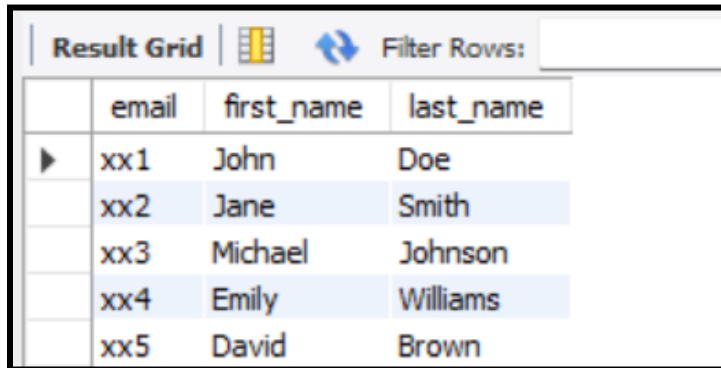

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with four columns: 'id', 'title', 'author_name', and 'author_email'. The table is currently empty. The interface also includes a 'Filter Rows' button and a search input field. There are some red dots on the right side of the grid.

	id	title	author_name	author_email
--	----	-------	-------------	--------------

The SQL provided consists of all the codes and the queries, which have been stated clearly for understanding , while MySQL Workbench for Windows has been used for the database creation.

Below are screenshots of the Individual tables and relationships created.

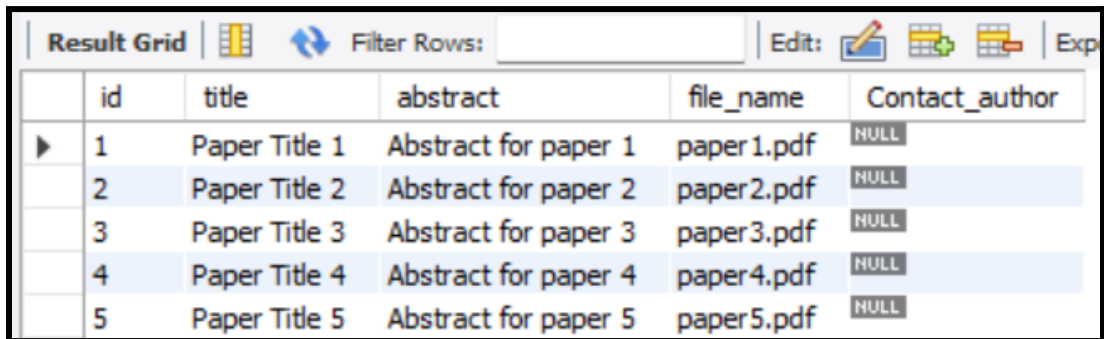

1. Table Author

A screenshot of the MySQL Workbench Result Grid interface. The interface includes a toolbar with icons for 'Result Grid', 'Filter Rows', and 'Edit'. The table data is as follows:

	email	first_name	last_name
▶	xx1	John	Doe
	xx2	Jane	Smith
	xx3	Michael	Johnson
	xx4	Emily	Williams
	xx5	David	Brown

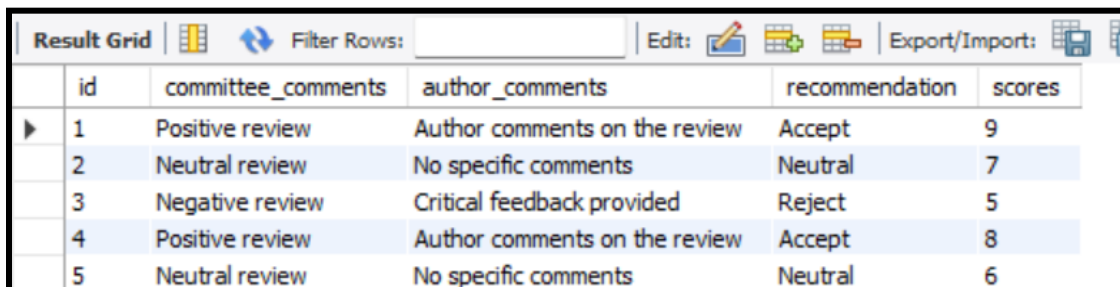

2. Table paper

A screenshot of the MySQL Workbench Result Grid interface. The interface includes a toolbar with icons for 'Result Grid', 'Filter Rows', 'Edit', and 'Export/Import'. The table data is as follows:

	id	title	abstract	file_name	Contact_author
▶	1	Paper Title 1	Abstract for paper 1	paper1.pdf	NULL
	2	Paper Title 2	Abstract for paper 2	paper2.pdf	NULL
	3	Paper Title 3	Abstract for paper 3	paper3.pdf	NULL
	4	Paper Title 4	Abstract for paper 4	paper4.pdf	NULL
	5	Paper Title 5	Abstract for paper 5	paper5.pdf	NULL

3. Table Review

A screenshot of the MySQL Workbench Result Grid interface. The interface includes a toolbar with icons for 'Result Grid', 'Filter Rows', 'Edit', and 'Export/Import'. The table data is as follows:

	id	committee_comments	author_comments	recommendation	scores
▶	1	Positive review	Author comments on the review	Accept	9
	2	Neutral review	No specific comments	Neutral	7
	3	Negative review	Critical feedback provided	Reject	5
	4	Positive review	Author comments on the review	Accept	8
	5	Neutral review	No specific comments	Neutral	6

4. Table Reviewer

Result Grid					
Filter Rows: <input type="text"/>					
Edit:   					
Export/Import					
	r_email	r_first_name	r_last_name	Ph	Affiliation
▶	reviewer1@gmail.com	Alice	Johnson	123-456-7890	University A
	reviewer2@gmail.com	Bob	Smith	987-654-3210	University B
	reviewer3@yahoo.in	Carol	Williams	555-123-4567	University C
	reviewer4@hotmail.com	Daniel	Brown	777-888-9999	University D
	reviewer5@gmail.com	Eva	Davis	111-222-3333	University E

5. Table Topic

Result Grid		
Filter Rows: <input type="text"/>		
Edit: 		
	t_name	description_text
▶	Business	Business and economic trends
	Environment	Environmental issues and conservation
	Science	Scientific research and findings
	security	Cyber security
	Technology	Articles related to technology and innovation

6. Table Writes

Result Grid				
Filter Rows: <input type="text"/>				
Export:				
	p_id	title	author_f_name	author_email
▶	1	Paper Title 1	John	xx1
	2	Paper Title 2	Jane	xx2
	3	Paper Title 3	Michael	xx3
	4	Paper Title 4	Emily	xx4
	5	Paper Title 5	David	xx5

7. Table of_interests_for

Result Grid  Filter Rows: <input type="text"/> Export			
	t_name	r_email	r_first_name
▶	Technology	reviewer1@gmail.com	Alice
	Science	reviewer2@gmail.com	Bob
	Environment	reviewer3@yahoo.in	Carol
	security	reviewer4@hotmail.com	Daniel
	Business	reviewer5@gmail.com	Eva

8. Table generates

Result Grid  Filter Rows: <input type="text"/> Exp				
	score	recommendation	p_title	p_id
▶	8	Accept	Paper Title 1	1
	7	Neutral	Paper Title 2	2
	5	Reject	Paper Title 3	3
	9	Accept	Paper Title 4	4
	6	Neutral	Paper Title 5	5
